

Tell us what your project needs

Complete the points below and attach a BOQ, drawing or specification where available. The sales team will use the information to confirm the applicable product, technical requirements, availability and quotation.

1. Product category

PP-R, HDPE, PVC waste, PVC conduit, PVC pressure or gutter system.

2. Required nominal size

Use millimetres or inches exactly as shown in the project requirement.

3. Pressure class / specification

Required for HDPE and pressure-pipe enquiries. Write "Please advise" if not known.

4. Quantity

State pieces, pipe lengths, coils, bundles or total metres where applicable.

5. Intended application

Examples: hot/cold water, water distribution, waste line, cable routing or roof rainwater.

6. Delivery location

Include town, site name and any access or delivery timing requirement.

7. Contact information

Name, company, customer type, phone and email.

8. Supporting file

Attach a BOQ, drawing, tender specification or product schedule if available.

Final technical details are confirmed before quotation and supply.

Do not rely on nominal diameter alone for pressure class, wall thickness, grade or standard.
